DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 43-83 are rejected under 35 U.S.C. 102(a) as being anticipated by either of US 7,364,691 B2 to Barker et al (Barker et al) or US 2007/0290419 A1 to Goodman et al (Goodman et al). Each of Barker et al and Goodman et al teach a direct smelting furnace including cooling panels and methods of mounting the panels in the embodiments of figures 3-13 in Goodman et al and figures 4-14 of Barker et al for example, including elongated arcuate cooling plates (31) comprising cooling tubes (37) mounted in a zig-zag pattern, where each panel includes a plurality of projections (42) and pins (43) interacting with protrusions (49) and planar discs (51) in the manner recited in the instant claims, thereby showing all aspects of the above claims.

Claims 43-49, 69-72 and 81-83 are rejected under 35 U.S.C. 102(a) as being anticipated by US 2005/0218569 A1 to Stastny et al (Stastny et al). Stastny et al teaches a furnace (2) which could be employed for direct smelting including cooling panels (Fig. 1 for example) and methods of mounting the panels including elongated cooling plates (1) comprising cooling tubes (5), where each panel includes a plurality of projections (6) and pins (13) interacting with protrusions (11) and planar discs in the manner recited in the instant claims, thereby showing all aspects of the above claims.

Art Unit: 1733

Claims 43-49, 69-72 and 81-83 are rejected under 35 U.S.C. 102(b) as being anticipated by Japanese 2002-206107A (JP'107). JP'107 teaches a furnace (1) including cooling panels (2) and methods of mounting the panels in the embodiments of figures 1-6 example, including elongated cooling plates (2) comprising cooling tubes, where each panel includes a plurality of projections (8) interacting with protrusions (9) and planar discs (13, 14) in the manner recited in the instant claims, thereby showing all aspects of the above claims.
